

# Artists One Pager

MEODY

## What is mellody?

Mellody is a blockchain powered, contest platform that allows all artists to compete and get rewarded on the process.

All the music fans that vote on the respective contests are also rewarded.

All the participating entities are rewarded while also increasing the industry marketcap. Artists will get \$MLDY as a reward and music fans will get their voting artist NFT, Merch and Exclusive experiences

## Our vision

We strongly believe that artists are not fairly compensated for their content creation, we also believe that their fans should be able to support them and be rewarded for their loyalty.

Our main goal is to Help Artists and Music Fans by hosting contests where voters and participating artists can earn rewards.

## Investors and Partners

Portuguese  
Blockchain  
Alliance

## How can it help Artists?

1 Increase the number of fans and listeners

2 Increase the funding for new albums and projects

3 Promote the growth of a loyal fanbase

5 Promote the sale of exclusive and innovative merch

6 Worldwide Talent Recognition

By being a part of mellody you will be able to enter contests and promote your projects in the platform. You can share your fan base with the artists you are competing with, many users will discover your music. You will be able to interact with our amazing community that will help.

By giving rewards to the users who support you, you are supporting the creation of a loyal fanbase who will love to support you back.

Everytime you participate in a contest you will receive a large portion of the tokens that were used to vote in you.

## Perks

### Mellody Fund

5% of the contest fees will be used to support small artists and help take their career in to the next level.

### Talent Recognition

We will host multiple contests for starting artists, giving them a chance to start their career.

### Gamificated Platform

In addition to contests, we plan on upgrading the gamification on the platform, developing new ways for artists to get rewards
